

Township High School District 214's new Student Information System allows the school district to communicate electronically with parents about their teen's academic achievement. In order to do so, the district is requiring an email address to send notifications to parents via email. If you do not have an email address, one can be obtained by going to <http://gmail.com>, <http://yahoo.com>, <http://hotmail.com>, <http://netzero.net> or one of the many other email service providers. If you do not have access to a computer or Internet, District 214 computers are available for parents/students to use.

Privacy Statement

Township High School District 214 will never provide your email address to another party, unless specifically authorized by you. Your email address will be used exclusively for communications between the school district and you, the parent.
