

High School District 214 Strategic Planning

Proposal, DeliverEd

March 14, 2024

1

DeliverEd has expertise in the delivery approach, a proven approach for managing implementation across complex education systems

“delivery” (n.)

is a systematic process through which system leaders can drive progress and deliver results.

It involves asking the following questions consistently and rigorously:

- 1** What are we trying to do?
- 2** How are we planning to do it?
- 3** At any given moment, how will we know whether we are on track?
- 4** If we are not on track, what are we going to do about it?

→ Our nimble, experienced team is here to support you throughout the process ←

To us, a successful partnership includes high quality deliverables *and* building internal capacity to continue the work long after we're gone

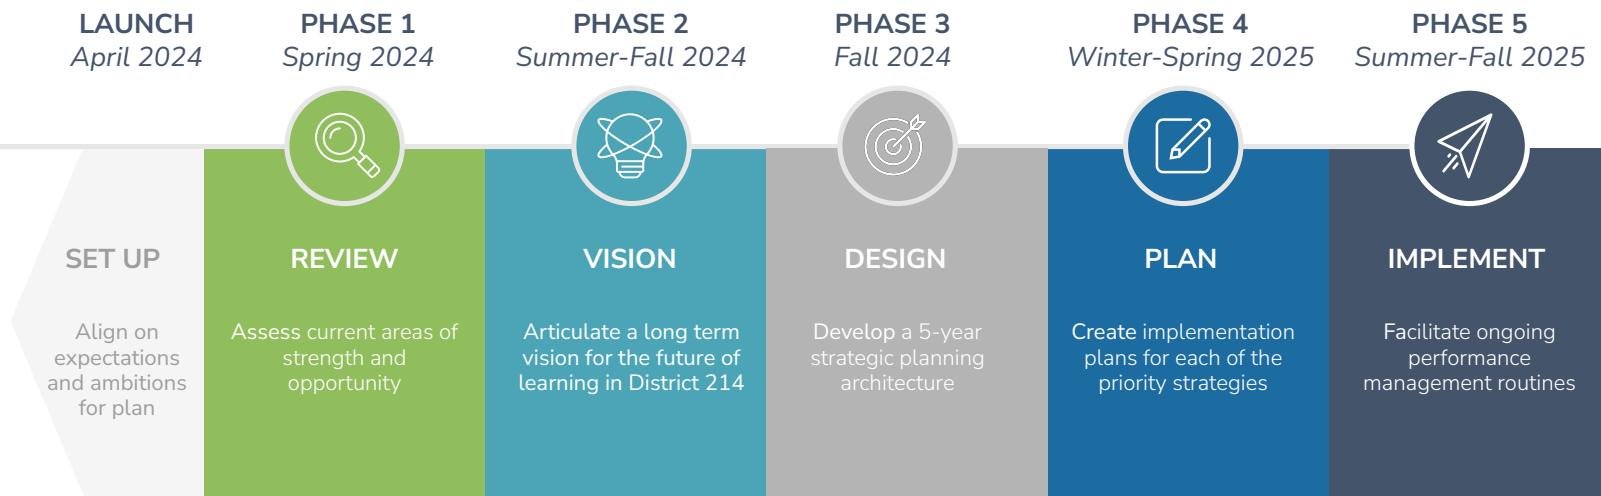

Deliver quality outputs

- A high-quality strategic vision and accompanying plan
- Presentation materials for use with stakeholders to share the plan
- Detailed internal working version of strategic plan in dynamic tool to track progress over the life of the plan
- Performance monitoring routines training, process, calendar, and resources

Build internal capacity

- Workshops to build skills around strategic thinking and use of data for improvement
- Intentional and ongoing support and coaching of assigned "Delivery Lead" to facilitate the progress monitoring process over time
- Coaching sessions for Superintendent and other leaders around implementation of the strategic plan

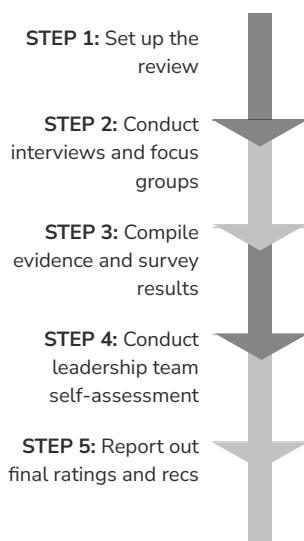

We propose an iterative process for rigorous planning, meaningful engagement, and effective execution of the strategic plan

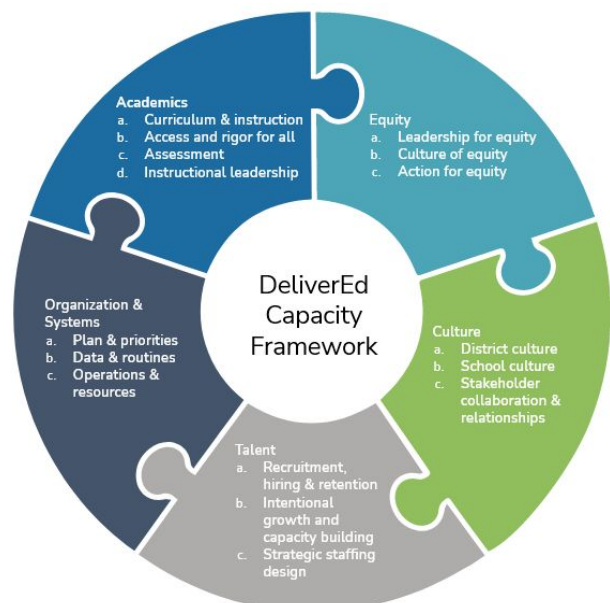

5

Phase 1 is structured around a thorough capacity review that engages stakeholders

The process is quick...

...and leverages our framework of 16 effective elements

6

We start by reviewing documents and data, facilitating focus groups and interviews, and surveying internal and external stakeholders

FOCUS GROUPS / INTERVIEWS

- Board members
- Superintendent
- Cabinet
- District leaders and managers
- School Administrators
- Teachers
- Support staff
- Community leaders
- Students
- Families/Caregivers

SURVEY RESPONDENTS

- Students
- Staff
- Teachers
- Family
- Community and non-school staff

DOCUMENTS AND DATA

- Historical and disaggregated achievement data
- Key data including: student attendance and behavior, staffing hiring/retention rates
- Organizational chart(s) and roles
- Graduate profiles
- Equity plans
- Any previous strategic plan(s)

7

We recognize the importance of an inclusive, representative process to build community support

More “out-of-the-box” approaches:

- Shadowing students
- Targeted empathy interviews (for students and families)
- Place-based survey distribution
- Town Halls (can be in person or virtual for maximum participation)
- [ThoughtExchange](#) or [Padlet](#)

To ensure an inclusive process, we recommend tagging on to existing stakeholder events:

- Joining staff meetings to gather staff input
- Utilizing student “advisory” periods for student activities
- Having a QR code to complete the survey at events where families are present (e.g., sporting events)
- Incentives are also great!

Note that all of these can be conducted virtually in addition to in-person and conducted in multiple languages to allow for greater participation

During Phase II, we would combine this stakeholder engagement with an analysis of the critical factors in the education landscape

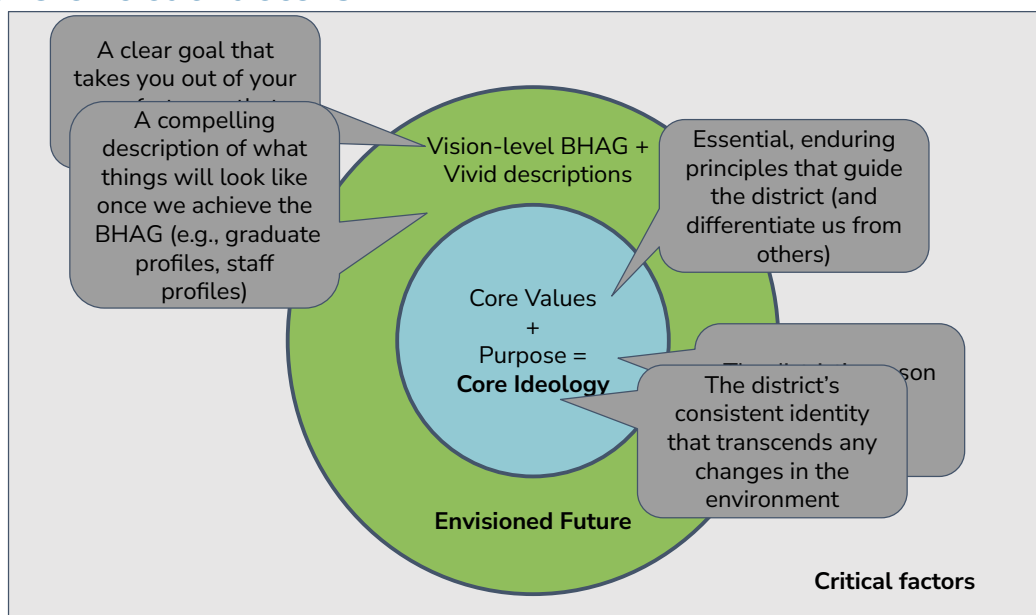

- Scan for *conditions, trends and assumptions* about what's coming in the future (locally and nationally)
- Identify those “*big shifts*” that are inevitable (e.g., AI)
- Based on this, *forecast various scenarios* and how they may influence the future of District 214 and education as a whole

Assumptions might include:

- Shifts in curriculum and instruction
- Technology innovation
- Local demographic shifts
- Local economic shifts
- Policy/governmental changes

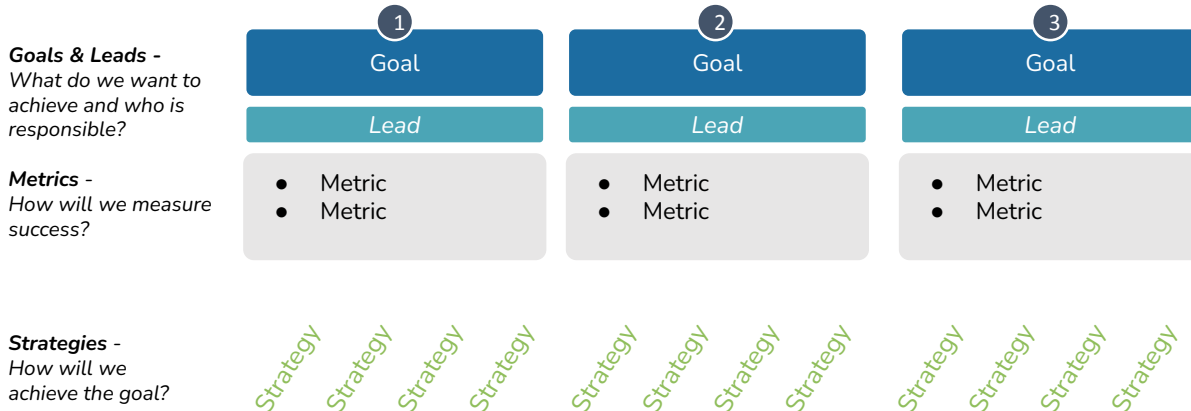

9

We would then facilitate the district to define several components of the long-range vision, grounded in the “core ideology” and taking into account the critical factors

Phase III involves drafting the strategic plan “architecture” that provides the overall structure for the five-year plan

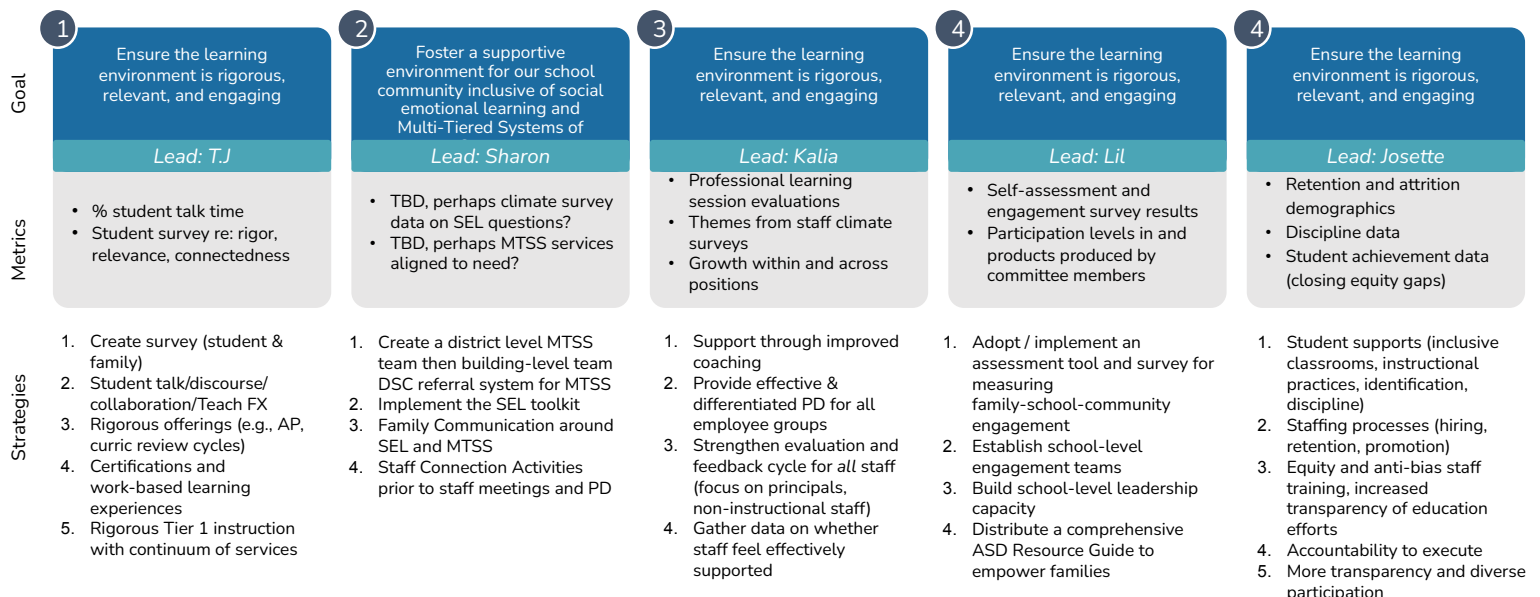

Strategic Plan Architecture components

SAMPLE: Strategic plan architecture

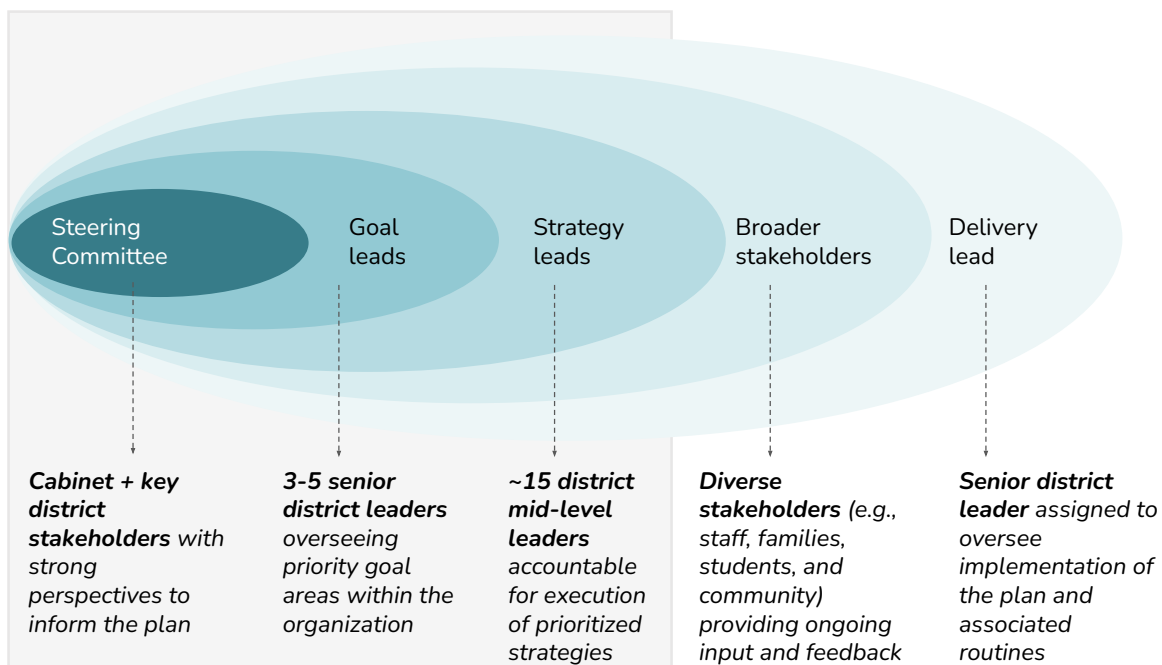

To create an educational system where each student is engaged, supported, and successful.

In Phase IV, we will define what implementation will look like for each strategy

An expanding group of stakeholders will be engaged and leveraged throughout the strategic planning process

Phase V involves setting up progress monitoring routines that will serve as the “engine” for making sure this plan stays alive

SAMPLE calendar of delivery routines

GOAL	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEPT	OCT	NOV	DEC
Student Achievement & Growth	▲					●▲	▲					●▲
Learning Environment		▲				●▲		▲				●▲
Family & Community Partnerships			▲			●▲			▲			●▲
Premier Workforce				▲		●▲				▲		●▲
Operational Resources					△	○△					△	○△

△ District stocktake
○ Board update

Our dynamic Smartsheet PIM allows for updating, reviewing, and revising of the plan throughout implementation

In order to keep the plan alive, we would work with you to ensure each goal has clear:

- Targets and timeframes for each metric
- Milestones within each strategy
- Clear owners accountable for each goal & strategy

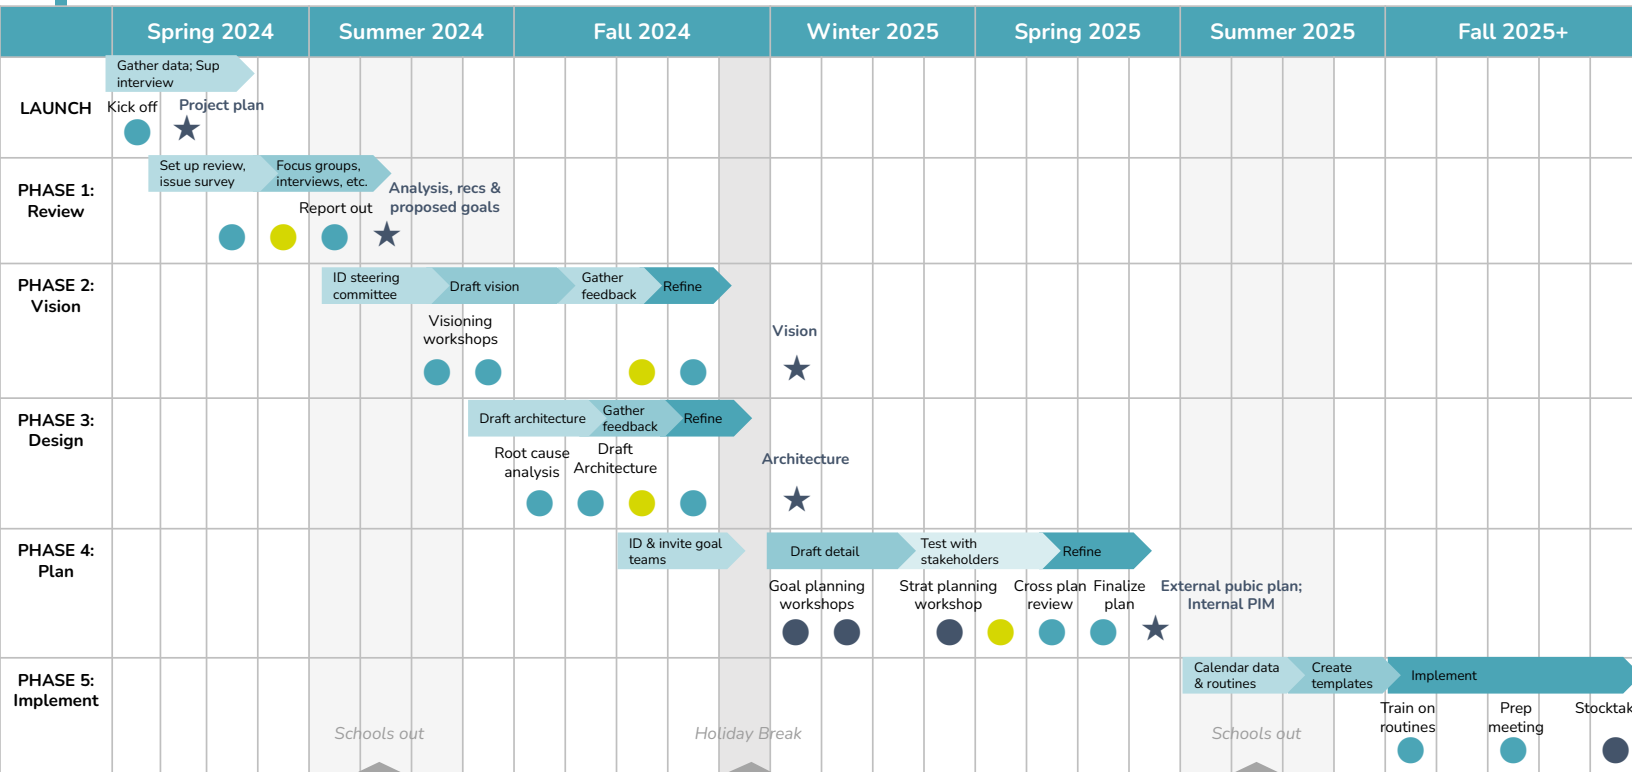

The DeliverEd Planning, Implementation and Monitoring (PIM) tool:

- Serves as a single place to review, update, and monitor plans
- Gives stakeholders ongoing and clear visibility into the work
- Provides insight into success and challenges
- Drives problem solving conversations
- Allows you to deliver stronger results

 Limited Availability

We have partnered with many school districts in developing high-quality implementation-focused plans

- [Appoquinimink School District](#) (DE)
- [Volusia County Schools](#) (FL)
- [Mukilteo School District](#) (WA)
- [Bernalillo Public Schools](#) (NM)
- [School District of Osceola County](#) (FL)

Note: These are public-facing versions of their plans; each of them has an accompanying internal document that has the necessary details for progress monitoring

We have deep experience supporting educators across the ecosystem to get results for students

We have partnered with:

25 school districts and 15 state education agencies across more than 25 states
