PESTICIDE APPLICATIONS

Effective August 15, 1999, the Illinois General Assembly passed PA 91-0099 (SB527) requiring that public schools notify parent(s)/guardian(s) and school employees at least two business days prior to any pesticide applications on school grounds. The term “pesticide” includes insecticides, herbicides, rodenticides, and fungicides. The notification requirement extends to both indoor and outdoor pesticide applications. Excluded from the notification requirement are antimicrobials (such as disinfectants, sanitizers, or deodorizers), insecticide baits, and rodenticide baits.

All District 214 schools and programs have established a registry of people who wish to be notified. Notification can be included in newsletters, bulletins, calendars, or other correspondence currently published by the school and district. To be included in the registry, please contact your student’s school/program for more information.
