

Illinois Transfer Process*

Section 2-3.13@ of the Illinois School Code request Illinois public schools to verify whether the student is "in good standing" and whether or not his/her medical needs are up-to-date and complete.

Public school districts are not required to admit new students unless the transferring student provides a completed form (ISBE 33-78) from their prior Illinois public school district. NOTE: Out of state or private school students are exempt from this legislation and a transfer student cannot be excluded from enrolling in the Illinois district of residence due to a suspension or expulsion in a previous Illinois school district. Obtain forms from school administration.
